Developer: person specification

Criteria

You will be a thoughtful, creative and curious full stack .NET developer, with at least two year's application development experience, and at least one year developing in C# in the ASP.NET MVC framework.

You will have experience both in back-end work (SQL, Entity Framework) and front-end development (JavaScript, Typescript, frameworks such as Angular or Aurelia).

You will be a clear thinker and problem-solver, able to communicate effectively with non-technical staff, and strongly self-motivated. You will be keen to develop your knowledge and skills at every opportunity.

As part of a very small team, a flexible approach and the determination to do whatever it takes to get the job done is vital.

Essential attributes

You will be able to show that you have knowledge, skills and experience in the following areas:

- 2 + years experience developing desktop or web applications in any language

- 1 + years experience of C# and ASP.NET MVC

- SQL

- Entity Framework

- JavaScript/Typescript

- Effective, supportive team working

- Motivation for personal and professional development

- Confident, clear verbal and written communication with both technical and non-technical staff

- Able to deliver high quality, tested, solutions under pressure

- Understanding of and support for the mission of Care Opinion

Desirable attributes

Experience and skills in any of the following would be an advantage:

- Domain driven design

- Data warehousing and BI

- Working with spatial data

- Single page application development

- Data visualisation in d3 or similar

- CQRS/event sourcing
